

# 500 Internal Privoxy Error

Privoxy encountered an error while processing your request:

**Could not load template file `no-server-data` or one of its included components.**

Please contact your proxy administrator.

If you are the proxy administrator, please put the required file(s) in the `(confdir)/templates` directory. The location of the `(confdir)` directory is specified in the main Privoxy `config` file. (It's typically the Privoxy install directory, or `/etc/privoxy/`).
